

VIBRATION ABSORBERS

Type	Description	Min. - Max. load [kg]	Tegning	Shore	Dimension				Order no.
V2A	Used for fan fixing on firm support, e.g. in connection with Gram brackets to avoid vibration propagation. Suitable at compressive force. Cylindrical vibration absorber/oscillation damping. Thread bar in both ends.	14 - 40		57	D	G	h	H	08 163 100
V2B	Used for fan fixing on firm support, e.g. in connection with Gram brackets to avoid vibration propagation. Suitable at compressive force. Cylindrical vibration absorber/oscillation damping. Thread bar in both ends.	6 - 17		43	D	G	h	H	08 163 000
V3	Application: see V2 above Cylindrical vibration absorber/oscillation damping. Thread bars in both ends.	30- 78		57	D	G	h	H	08 163 200
V4	Application: see V2 above Cylindrical vibration absorber/oscillation damping. Thread bars in both ends.	60 - 200		57	D	G	h	H	08 163 300
